From establishment till today

1981

Angelo Amodio establishes in Castellana Grotte IFAC INOX Srl, a small company of 4000sqm, for the production of refrigerators and insulation of commercial vehicles, for small-scale distribution. Over the years the company starts the sales of isothermal boxes.

1990

IFAC INOX after gaining a good experience in commercial vehicles insulation, and in the sales of isothermal boxes, the company starts, by organizing a planning office and buying a small production plant, the production of refrigerated vehicles. In 1991 after optimizing the production process, IFAC INOX obtains a product with good structural and isothermal features.

1996

Because of an increasing demand the product, IFAC INOX moves to a facility of 10.000sqm in Conversano, introducing in planning and production, technological systems and machineries.

2007

In order to reach the highest levels of quality, still respecting the environment, IFAC INOX opens a new plant in Acquaviva Delle Fonti, equipped with the latest generation machinery with automated systems, covering 20.000sqm, with 20.000sqm of external parking. The research and development department is expanded.

For easily and quickly serving commercial relationships with foreign clients, a new logistics office in Verona is opened.

2009

For a continuous expansion, and for offering a greater support to customers, a service and commercial centre is opened in Rome

2010

IFAC INOX Srl, becomes IFAC Spa, increasing its capital stock.
