Box max 19t, for mid-size distribution

Thanks to its practicality, the 19t is one of the most common boxes on the road.

Practicality and long-term reliability.

Small enough to be quick in and out of cities and large enough to carry the volume this sector continues to demand. Today's clients require an ever-increasing versatility and long-term product reliability. Manufactured with advanced materials with high structural features. IFAC boxes have been manufactured to reach the maximum quality and to confer the maximum long-term security.
